CAREER OBJECTIVE

Aspiring Python-Django developer and Computer Science and Engineering student with strong a passion for coding. Proficient in C, C++, Data Structures, and Algorithms. Worked with Python, Django, Django REST Framework, React. Eager to contribute to innovative projects within a collaborative team environment, where I can learn from experienced developers, grow my leadership skills, and achieve my goal of becoming a full-stack developer.

SKILLS AND TEACHNOLOGIES

Languages

C || C++ || JavaScript || Python

Frontend Technologies

HTML || CSS || Tailwind CSS || React

Tools

VS Code || Github

Backend Technologies

Django || Django REST Framework

Database

MySQL

PROJECTS

1. Lifted & Listed - Ecommerce Website

[Live Link](#) || [Front-End](#) || [Back-End](#)

Technologies Used: HTML, CSS, Tailwind CSS, JavaScript, Django REST Framework, PostgreSQL

Features:

- Easily list, buy, and sell a wide range of products. Connect directly with buyers and sellers for smooth transactions.
- Manage your listings, track purchases and sales, and update account information with ease.
- Benefit from secure email verification and protected transactions for a safe shopping environment.

2. Fur Ever Friends - Pet adoption platform

[Live Link](#) || [Front-End](#) || [Back-End](#)

Technologies Used: JSX, CSS, Tailwind CSS, React.js, Django REST Framework, PostgreSQL

Features:

- Developed a task management app, Taskly, with features for creating, editing, and deleting tasks, enhancing user productivity.
- Implemented secure user authentication and session management using token-based authentication for reliable access control.
- Built the frontend using React.js, optimizing the user interface for a seamless and responsive experience.

3. Around The Flag -

[Live Link](#) || [Github Link](#)

Technologies Used: JSX, CSS, Tailwind CSS, React.js, REST API

Features:

- Efficiently search for countries by name or filter them by region for quick discovery.
 - Explore detailed information about each country, including its neighbors, with a user-friendly interface.
 - Seamlessly navigate between countries through border connections, facilitating geographical exploration.
-

EDUCATION

B.Sc in Computer Science & Engineering

City University, Bangladesh

December – 2022 - Ongoing

EXTRACURRICULAR ACTIVITES

Organizing Secretary

Competitive Programming Camp City University

ACHIEVEMENTS

Pupil rank at Codeforces

3 Star at Codechef
